2. LOW-VOLTAGE HOSE

2.1 Compatibility

The hose is compatible with most wall inlets. Inlets must have a 1.5" inner diameter **(A)** in order for the hose to fit, and must have 2 low-voltage pins/metal prongs **(B)** in order to turn the hose ON/OFF from the switch located on the hose handle.

2.2 Connecting the hose to the wall inlet

The hose end cuff must be connected as shown in the picture below. The black part on the end cuff must be well aligned with the 2 pins inside the inlet **(C)**. The plastic square must be facing up **(D)**.

2.3 Starting and stopping your central vacuum

If your inlets have 2 low-voltage pins inside as demonstrated in step 2.1, you will be able to start and stop your central vacuum directly from the switch on the hose handle.

3. HOW TO USE THE WAND

3.1 How to extend the wand

To extend the wand, simply push on the button **(E)** and pull on the wand **(F)** at the same time

3.1 How to connect the wand to the hose nozzle

Align the hose nozzle button **(G)** with the lock button on the wand **(H)** and push the nozzle into the wand until you hear a "click".

3.1 How to connect the different attachment tools

Insert the other end of the wand into the port on the brushes
