2. STRAIGHT AIR HOSE

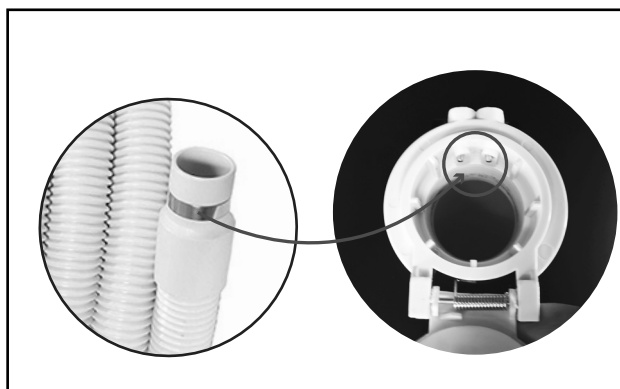

2.1 Compatibility

The hose is compatible with most wall inlets. Inlets must have a 1.5" inner diameter **(A)** in order for the hose to fit, and must have 2 low-voltage pins/metal prongs **(B)** in order to turn the vacuum ON and OFF.

2.2 Starting and stopping your central vacuum

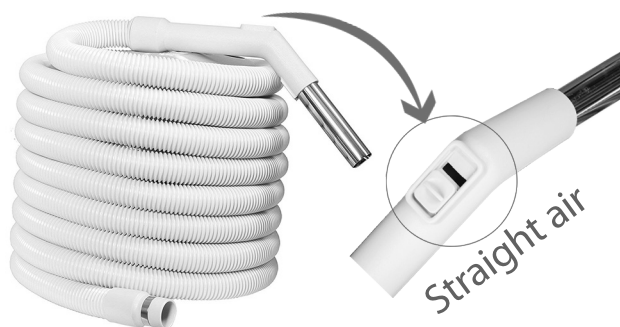

The vacuum will automatically start when the hose is inserted in the wall inlet and the unit will stop when the hose is removed from the inlet.

Hose metal band must be touching the 2 pins inside the inlet in order to create the connection

2.3 Suction release

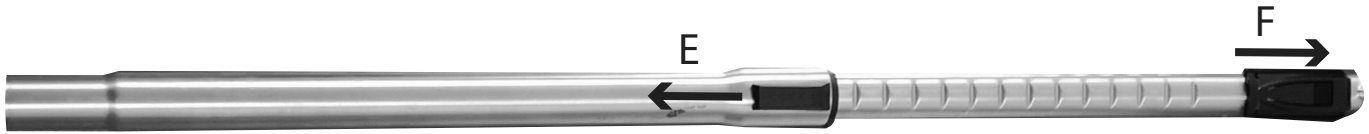

If the suction is too strong for your needs, use this opening on the hose handle to slightly reduce it.

3. HOW TO USE THE WAND

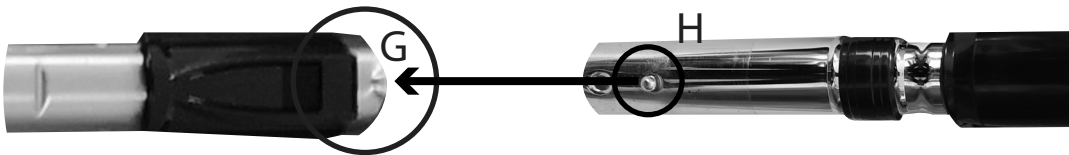

3.1 How to extend the wand

To extend the wand, simply push on the button **(E)** and pull on the wand **(F)** at the same time

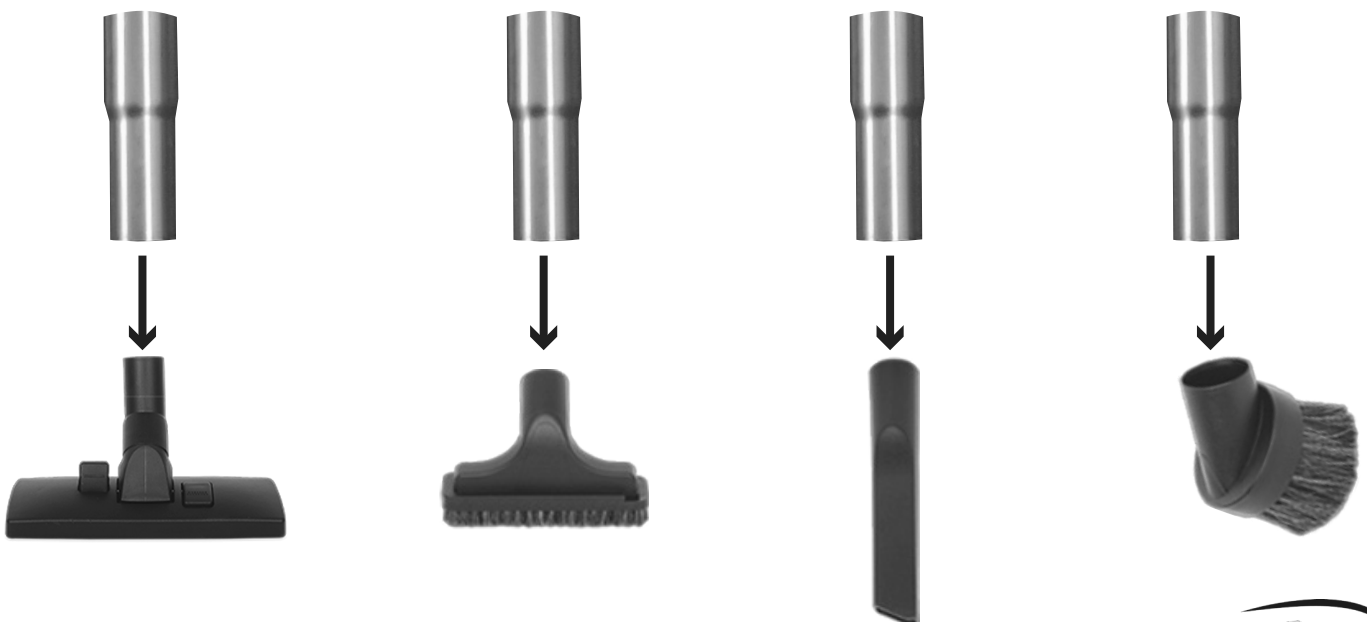

3.1 How to connect the wand to the hose nozzle

Align the hose nozzle button **(G)** with the lock button on the wand **(H)** and push the nozzle into the wand until you hear a “click”.

3.1 How to connect the different attachment tools

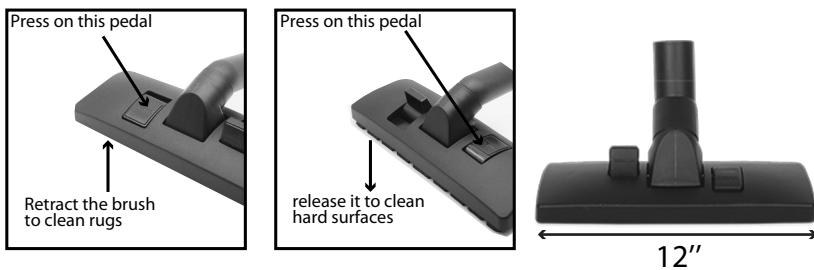

Insert the other end of the wand into the port on the brushes

4. INCLUDED CLEANING TOOLS
